MINISTRY OF EDUCATION AND HUMAN RESOURCE DEVELOPMENT

General Education and Skills Pathway Programme of Study

TECHNOLOGY AND ENTERPRISE

CONTEXT: HEALTH AND WELFARE

Secondary Four and Five

ENDORSED BY NCAC MARCH 2020

Acknowledgements

Work on the Technology and Enterprise Programme of Study within the General Education and Skills Pathway was put together by the Technology and enterprise Heads of Department (HOD) and Teachers from the state Secondary Schools. They were supported by the Secondary Curriculum and Teacher Support Team in the Ministry of Education and Human Resource Development.

Rationale

The General Education and Skill Development Pathway for students at key stage 5 (S4-S5) will cover a period of two years. It has been designed using the competency based approach. At the end of this Programme the students will be able to enroll as a first year student at any chosen institution or he /she will have sufficient skills and knowledge to enter the world of work as an apprentice.

The students will attend classes at their respective school for the whole of first term to be taught the pre requisite knowledge such as Careers guidance, Modules within the Health and welfare context which will enable the students to gain enough skills and knowledge to cope on a work-Based experience Programme. The student will be placed in the industry/job of their specific choice beginning of term two. They will attend school/session for three days and two days on Work Based Experience (WBE) every week during term time for two terms at key stage 4 (S4) and will attend school/session for two days and three days on WBE every week during term time for two terms at key stage 5 (S5). WBE is the main focus within the programme to enable the student to put into practice the knowledge and skills that has been taught/demonstrate at school.

The students are expected to gain the basic practical skills and knowledge in Health and welfare contexts. When teaching the Health and welfare Contexts ICT should be used as part of the means of instructions and will be integrated to enable the students to use ICT context related software and site so that they are up to date with the modern technological development and ensure lifelong learning. Entrepreneurial skills and knowledge should be incorporated when teaching the Health and welfare context, this will enable the student to better understand how to start/what it entails to start up their own business and their responsibility as a productive worker/employee within the Health and welfare career/context.

After completing the five modules the students should be able to work alongside a competent technician/professional as an apprentice within Health and welfare career.

2.0 Key Stage 5 – Year 4 Programme of Study 2020

2.1 CONTEXT: Health and Welfare

2.2 School – Based Contact Hours per Week: 160 minutes Per Year: 6240mins/104hrs.

Minimum compulsory/mandatory Area for Teaching and Learning	Minimum compulsory/mandatory Areas(Knowledge, skills, Attitudes) Teachers Expected to Teach	Minimum compulsory/mandatory Area (Knowledge, skills, Attitudes) Students Expected to Learn	ASSESSMENT	Mandatory School – Based Teaching and Learning Resources (Textbooks, workbooks, Equipment etc.)
TERM ONE				
The Family	KNOWLEDGE • Elements of a family - Types of family • Roles and responsibilities of a family - Personal hygiene • Importance of partners in the family - Influence - Love - Affection • Importance of marital relationship • Family roles in the community - Family values • Importance of family planning	KNOWLEDGE • Stating the main elements of a family • Discussing the roles and responsibilities of a family -Family conflicts - resolutions • Stating the importance of partners in the family • Discussing about marital relationship • Discussing courtship and marriage • Stating the roles and importance of family in the community • Discussing importance of family planning	ASSESSMENT • Oral questions • Assignment research on Family	Posters related to types of family Books Home Economics 2

		Skills • Able to work in groups. • Developing their communication skills both oral and written. Attitude • Appreciating the work of others and the commonality of needs • Wanting to find out more about themselves and their interdependent relationship with other people and the community.		

Minimum compulsory/mandatory Area for Teaching and Learning	Minimum compulsory/mandatory Areas(Knowledge, skills, Attitudes) Teachers Expected to Teach	Minimum compulsory/mandatory Area (Knowledge, skills, Attitudes) Students Expected to Learn	ASSESSMENT	Mandatory School – Based Teaching and Learning Resources (Textbooks, workbooks, Equipment etc.)
TERM TWO				
Parenthood	KNOWLEDGE • Main elements of parenthood • Importance of conception and reproduction • Pregnancy needs of an expected mother • Elements of pre-natal development • Principles of labour and delivery - Antenatal visits	KNOWLEDGE • Listing the main elements of parenthood • Discussing the importance of conception and reproduction. • Listing the needs of a pregnant mother • Explaining briefly the notion of labour and delivery	Assessment • Assignment on parenthood • Class activity • Home work	AQA child development for IGCSE Posters handouts parenting websites
TERM THREE				
BABYCARE	Knowledge • Main elements of baby care. - Baby needs - Feeding (bottle) - sterilization - Bath time - Crying - clothing	Knowledge • Listing the main elements of baby care • Discussing the importance of feeding and bathing • Explaining the significance of crying	Assessment • Assignment on the main elements of baby care	Oral questions Online videos Medical journals and documentaries Telemedical videos

FEEDING YOUNG CHILDREN	• Main principles of feeding young children - Food and Nutrition - Diet and mealtime - Weaning - Food hygiene - Teething	• Outlining the main principles of feeding young children • Discussing nutritional needs of children • Listing the types of diet • Stating the mealtime for growing children • Stating good food hygiene practices • Discussing teething processes Attitude • Appreciating, respecting and valuing the different physical and human environment and reflect positively upon their own place in it.		Feeding documentaries Internet resource

3.0 Key Stage 5 – Year 5 Programme of Study 2020

3.1 CONTEXT: Health and Welfare

3.2 School – Based Contact Hours per Week: 160 minutes Per Year: 6240mins/104hrs.

Minimum compulsory/mandatory Area for Teaching and Learning	Minimum compulsory/mandatory Areas(Knowledge, skills, Attitudes) Teachers Expected to Teach	Minimum compulsory/mandatory Area (Knowledge, skills, Attitudes) Students Expected to Learn	ASSESSMENT	Mandatory School – Based Teaching and Learning Resources (Textbooks, workbooks, Equipment etc.)
TERM ONE				
EARLY CHILDHOOD	Knowledge • Main elements of early childhood - Physical development - Social development - Emotional development - Intellectual development • Importance of play and toys • Gender stereotyping in relation to play. • Job opportunities and careers in early childhood field	Knowledge • Stating the main elements of early childhood • Listing the physical development • Discussing the social development of the child • Discussing the emotional development of the child • Listing some intellectual development of the child. • Outlining the importance of play • Stating the importance of play and toys • Discussing the significance of stereotyping in relation to play • Listing jobs careers and opportunities	Assessment • Questions on Elements of early childhood. • Assignment on social and emotional development of the child. • Project on types and quality of toys sold in shops.	-motorized toys -Talking toys -Educational games - MOH documentaries

		Skills • Developing research skills • Presenting of work. • Recording observations clearly while carrying task Attitudes • Be happy to carry out task that are within their capacity		
TERM TWO				
HEALTHY AND SAFETY	Knowledge • common infectious diseases - fungal - bacterial - viral - allergies - etc • Main parasitic problems - internal - external • Key elements in nursing sick children - Traditional medicine • Importance of vaccination and immunization • Accident prevention and first aid	Knowledge • Listing a few common infectious diseases • Listing the major internal and external parasitic diseases • Stating key points how sick children are taken care • Discussing the importance of vaccination and immunization • Discussing the importance of the use of medicinal plants • Listing some common vaccination and immunization taken by young children • Discussing the importance of accident prevention.	Assessment • Assignment on common infectious diseases in Seychelles • Questions on vaccination and immunization • Research work on the use of medicinal plants in Seychelles	Health and safety videos. Health and safety simulations

WELLNESS AND SPA	• Importance of wellness and spa • Importance of essential oils • Element s of pedicure • Elements of manicure	• Discussing the importance of first aid. • Stating importance of wellness and spa • Explaining the massage process • Outlining pedicure processes • Listing the types of manicure Skills • Demonstrating the procedure of manicure and manicure. • Able to perform basic massage techniques. Attitude • Work confidently and responsibly with equipment and resources • Demonstrating curiosity, patience and persistence	• Assignment on importance of wellness and spa. • Project work on essential oils for massage. • Practical assessment on pedicure and manicure procedure.
